➤ SUMMARY

Passionate about solving problems and committed to building products and web applications with a beautiful user experience. Proven track record succeeding under tight deadlines and adapting to change. Self-motivated and focused on achieving a balance between utility and design through well thought out and efficient code.

➤ SKILLS

LANGUAGES: JavaScript, HTML, CSS, SQL, Python

FRAMEWORKS: React, Node, Express, Bootstrap, Django

DATABASES: PostgreSQL, Sequelize, MongoDB, Mongoose

OTHER: jQuery, AJAX, Git, Heroku, REST/JSON

➤ EDUCATION

General Assembly

Web Development Immersive 2018

University of North Florida

Bachelor of Business Administration,
Finance 2009

➤ PROJECTS

Whereabouts

Built a responsive web app with full CRUD functionality using the Express framework for Node and PostgreSQL. Incorporated the tumblr API and the Passport authentication middleware for Node.

Venture!

A responsive MERN stack app built in collaboration with two other developers at General Assembly. A user can create an account to search their next travel destination and save popular restaurants via the Yelp API and create a packing list.

Whack-a-Shark!

A fun take on the classic 'whack-a-mole' built with vanilla JavaScript, HTML, CSS.
