## ➤ EDUCATION

### General Assembly

Web Development Immersive 2018

### University of North Florida

Bachelor of Business Administration, Finance 2009

## ➤ EXPERIENCE

### Freelance Project for Real Estate Team

May 2018 to Current

Web Developer

Seattle, WA

- Built with React, Express and Node and is deployed with AWS Elastic Beanstalk.
- Incorporates Spark Platform API for listing data. Local information for lead generation and client engagement.
- A user can view featured listings, read reviews and learn about buying and selling with the agent's team.

### Keller Williams Realty

Sept. 2012 to Nov. 2017

Team Manager

Boca Raton, FL

- Managed daily operations of a top performing Real Estate team and provided exceptional customer service to all clients.
- Created and improved systems for goal and conversions tracking, transaction coordination, marketing and lead generation.
- Reviewed contracts, monitored all deadlines and coordinated logistics with all parties throughout the selling process.

### Knowledge Universe

June 2011 to Aug. 2012

Human Resources Specialist

Portland, OR

- Supportive member of the benefits team responding to employee inquiries and providing accurate information, according to law and policy.
- Processed requests to add, change or cancel insurance coverage and reviewed applicant paperwork to ensure compliance with company policy.
- Initiated and reviewed national criminal background checks using ADP.

### Keller Williams Realty

March 2010 to March 2011

Executive Assistant

Portland, OR

- Supported lead agent in daily operations allowing them to focus on growth.
- Proactively sought ways to improve team marketing and branding and monitored and maintained all paperwork and transaction coordination.
- Updated and maintained team contact database, website and calendar. Prepared market reports evaluating inventory and sales volume.

## ➤ PROJECTS

### Whereabouts

Built a responsive web application with full CRUD functionality using the Express framework for Node and PostgreSQL. Incorporated the tumblr API and the Passport authentication middleware for Node.

### Venture!

A responsive MERN stack app built in collaboration with two other developers at General Assembly. An end user can create an account to search their next travel destination and save popular restaurants via the Yelp API and create a packing list.

### Whack-A-Shark!

A fun take on the classic 'whack-a-mole' built with vanilla JavaScript, HTML, CSS.
