❯ SUMMARY

Passionate about solving problems and committed to building a product and web applications with a beautiful user experience. Proven track record succeeding under tight deadlines and demonstrating the ability to collaborate. Self-motivated and focused on achieving a balance between usability and design through well thought out and efficient code. Strong level of curiosity and interest to learn every day.

❯ SKILLS

LANGUAGES: JavaScript, HTML, CSS, SQL
FRAMEWORKS: Reactjs, Node.js, Express.js, Bootstrap
DATABASES: PostgreSQL, Sequelize, Mongodb, Mongoose
OTHER: jQuery, AJAX, REST/JSON, APIs, Version Control, Communication Skills

❯ EDUCATION

General Assembly
Web Development Immersive 2018

University of North Florida
Bachelor of Business Administration, Finance 2009

❯ PROJECTS

Current: Real Estate Team
In progress - freelance project built with React, Express and Node. Incorporates Spark Platform API for listing data and is deployed with AWS Elastic Beanstalk. A user can view featured listings, read reviews and learn about buying and selling with the agent's team.

Whereabouts
Built a responsive web application with full CRUD functionality using the Express framework for Node and PostgreSQL. Incorporated the tumblr API and the Passport authentication middleware for Node.

Venture!
A responsive MERN stack app built in collaboration with two other developers at General Assembly. A user can create an account to search their next travel destination and save popular restaurants via the Yelp API and create a packing list.
